*“With Google Cloud Platform, Webydo’s designers are ready to conquer the market and shape a better web for us all.”*  
— Shmulik Grizim, cofounder and CEO, Webydo

---

#### Challenge: Web-scale security

Attacks to the system can cause unplanned outages, so protection is crucial. A public mega-website, by nature, deals with great security risks, such as X]grf]Vi hYX`XYb]U`cZgYfj Jw`fB8cGLUHUW\_g"GdYVj Wā YUgi fYg'a i ghVY`HU\_Yb` to safeguard against security vulnerabilities. Moreover, data leakage must be prevented to maintain users' privacy and avoid unauthorized transfer of the website's assets.

#### Solution: Transparency and comprehensive network protection
